MedSync

“Medication synchronization” is when your pharmacist coordinates all refills to be ready the same day. This helps to decrease the chances of you missing doses, missing refills or not filling all of your prescriptions.

Talk to your pharmacist about syncing your medications to help reduce trips to the pharmacy and simplify your monthly medication routine.

Dose Packaging Services

This is a great option if you take multiple medications at different times throughout the day. Your daily medications arrive in presorted, sealed pouches for each time of day — such as morning, evening and bedtime. It eliminates the need for pill containers and helps ensure you take the right pills at the right time.

If this service is not available through your local pharmacy, consider using one of the following pharmacies to set up 30-day dose packaging at no additional cost to you.
